1. Place header on top of frame and insert metal stiffeners of the frame into the slots in the header. Backboard of frame inserts flush with end of header. Fasten with nails or screws (not provided).
2. Stand complete frame into opening, plumb and anchor to sub-floor.
3. Shim, level, and secure header to framed opening with screws (not provided).
4. Rubber bumper has been installed on backboard so that door will extend past jambs in order to be flush with trim when applied.
5. Install door guides.
6. Remove all shipping blocks.
7. Attach hardware per instructions on hardware bag.

**NOTE:** If necessary to have more rigidity when nailing wall materials, insert a block between the metal stiffeners and withdraw the block before installing the door.

**CAUTION:** Use proper length nails or screws on wall materials to avoid damaging the door in the pocket.

**NOTE:** Track must be level and square with jamb. Door must be sealed on all 6 sides.

A/ **Attach door plates** on top of the door 2" from each edge with lock tabs on same side.
B/ **Insert Hanger** into track alternating wheel positions for even weight distribution.
C/ **Mount Door** by locating door plate under adjusting bolt of hanger and tilting door until bolt will slide into seat of door plate. Repeat with other hanger/door plate. Adjust hangers for height and plumb with jamb.
D/ **Attach guides** at bottom of opening and adjust so door is centered in opening.
